

[Well Woman Checkup Package](#)

A dedicated well woman clinic is being run by our Gynecology Department. The clinic aids the general health check up of women through

- ∅ Detection of precancerous condition of female reproductive organ according to international criteria
- ∅ Rule out the infection of female genitalia and urinary tract
- ∅ Determine other possible gynaecological problems

The visit will include

- Complete history
- A general physical examination
- Breast examination for any lumps & abnormality
- A gynecological examination / internal check

The examinations will be supported by the following investigations:

- Cervical / pap smear.
- Ultra sound pelvis (for status of uterus, tubes, ovaries and adnexa)
- Blood complete picture.
- Urine detailed report.
- Blood Sugar Random.
- High vaginal swab

Additional/ specialized investigation will be individualized for patients according to her needs as indicated by her history, examination and reports.

- Mammography if age is more than 50 years
